1. (S/NF/SK) MISSION: Access and describe [REDACTED] SG1A

2. (S/NF/SK) VIEWER TASKING: Access and describe the target personality. Describe his position, function, and surroundings. Provide phonetics to identify the name of target personality; conduct search to determine his current location.

3. (S/NF/SK) COMMENTS: No inclemencies noted. 025 was requested to describe the target personality's surroundings. Requirements related to target personality's identity and position were deemed too demanding to field as an initial query; it is believed that 025 would have been precipitated into AOL drive. Refinement to determine target personality's position resulted from the use of the color code system related to the Yes/No answers. Use of color codes to determine target personality's name became involved, tedious, as in a "too much break." The search area was refined to a world map area west of the US. The areas of Borneo and Seoul, Korea, surfaced as the main areas of interest. The use of colors was particularly helpful in that it forced 025 to view from a right brain perspective, and place utter an utmost reliance on her guides.
